WDBS DARTMOUTH BROADCASTING SYSTEM
49 ROBINSON HALL · HANOVER · NEW HAMPSHIRE · TELEPHONE 30

April 16, 1951

Dear Paula,

Your note did not catch up with me in the Swiss Alps, but did in St. Pete, Florida; therefore, please excuse the delay in answering.

Our broadcasting hours are from six to one. I gave Selma a complete schedule of all newscasts and on that sheet noted the shows that had sponsors and were to be more or less given as to our format. I think if you'll check with her she has that information.

Our chief engineer gave EdieClark a diagram of our board plus a picture, so she and her crew(which will indeed operate our console) should be fairly well squared away.

I made a reservation this morning for twenty or so at the Green Lantern Inn at the cost of $2 a head- that's with bath too and you'll all be in the same place. please note for blue cards

We have a new tape machine (Ampex) that will take speeds of 7.5 and 15, either 10½" or 7" reels. As I recall you have one of those darn Revere machines that only has 3 3/4 speed. If such is the case, bring it along and we'll patch it into the circuits with ease.

When you gals get in, come to Robinson Hall and seek me out so I can get you all settled. The offices are downstairs and the news, production, studios on the third floor.

Will be seen' you.

Bill
